Here on Livetraders.com we wanted to show people what REAL trade looks like. We offer different strategies and techniques that are suitable for the majority of aspiring traders. We teach on intra-day trading, swing from any location there is an internet connection, making this a really special and unique company. Here at Livetraders.com was to build a trading community, from traders, to traders and foourse by traders. Most of our customers come through word of mouth, which says a lot! We want them to see how transactions are executed and how to deal with the many different scenarios that the stock market can throw at you. It's that Jared and Anmol created Livetraders.com. We have gone through the countless pitfalls that this company inevitably dishes out to everyone and we survived through hard work, dedication and passion for success. We were able to do this for 3 main reasons: Dedication, Education and Perseverance. Between the 2 of us we have had the opportunity to attend many seminars and try out many different trading chat rooms over the years, and although there is generally good intention among most educational trading companies, they usually lack the important specific details needed in becoming a profitable professional trader. So, if you are looking for a place that is open and honest about how to become a successful trader look no further than Livetraders.com. Jared & amp; Anmol are there to help you realize your dreams of becoming the best trader you are. We've spent a long time mastering our craft, and now we have a platform to help others by showing them what profitable trading looks like. Anyone can learn how to trade, but it takes a team and professional training to learn how to make money. So join the team and find out how its members pull money out of the market regularly.
